

I use my car for business and travel 50 to 100 miles a day at times. I got XM radio because of the choices it gives me and would hurt if traffic was taken away since I am able to adjust my driving to the conditions I hear. This is a service just like cable tv or satellite TV they offer a service at a cost why would you give the National Association of Broadcasters the power to monopolize an item that is paid for. They don't offer traffic but a few times a day. Why can't I get what I want if I am willing to pay for it?
